

Global Product Monitoring

The Mallinckrodt Product Monitoring Department consists of healthcare and life science professionals responsible for handling the following compliance and U.S. Food and Drug Administration-regulated activities:

- Capturing, documenting, analyzing and reviewing quality complaints for Mallinckrodt's pharmaceutical, critical care and active pharmaceutical ingredients
- Coordinating quality complaint investigations
- Submission of Medical Device/Vigilance reports

You may contact Product Monitoring as follows to report any quality complaint or medical device report:
